#### APPROVALS AND WARRANTY

#### **APPROVALS**

- AHRI Standard 210/240 certified
- · AHRI Certified system match-ups and expanded ratings, visit www.ahridirectory.org
- Sound rated to AHRI Standard 270-2008 test conditions
- Tested in an environmental test room
- Rated According to U.S. Department of Energy (DOE) test procedures
- Unit and components ETL, NEC and CEC bonded for grounding to meet safety standards for servicing
- ETL certified (U.S. and Canada)
- ISO 9001 Registered Manufacturing Quality System

#### **WARRANTY**

- · Compressor:
  - · Limited five years in non-residential installations
- · All other covered components:
  - · Limited one year in non-residential installations

**NOTE** - Refer to Limited Warranty certificate included with unit for specific details.

#### **FEATURES**

### **APPLICATIONS**

- 3 through 5 tons
- · Three-phase power supply
- · Sound levels as low as 76 dBA
- Vertical air discharge
- Applicable to indoor air handlers or gas furnaces with indoor add-on coils
- · Shipped completely factory assembled, piped and wired
- · Factory test operated

### REFRIGERATION SYSTEM

#### R-410A Refrigerant

- Non-chlorine, ozone friendly
- · Unit is factory pre-charged

# 1 Outdoor Coil Fan

- · Direct drive fan
- Vertical air discharge
- · Louvered steel top fan guard
- · Totally enclosed fan motor
- · Rain shield
- Ball bearings
- Inherently protected

#### High Capacity Liquid Line Drier

- Factory installed in the liquid line
- Drier traps moisture or dirt
- 100% molecular-sieve, bead type

# High Pressure Switch

- Protects the system from high pressure conditions
- Automatic reset

#### Low Pressure Switch

- · Shuts off unit if suction pressure falls below setting
- · Loss of charge and freeze-up protection
- · Automatic reset

# 2 Copper Tube/Enhanced Fin Coil

- Ripple-edged aluminum fins
- Copper tube construction
- · Lanced fins for maximum fin surface exposure
- Fin collars grip tubing for maximum contact area
- Flared shoulder tubing connections
- · Silver soldering construction.
- · Factory tested under high pressure
- Entire coil is accessible for cleaning.
- PVC coated steel wire coil guard furnished

#### **Optional Accessories**

#### **Expansion Valve Kits**

- · Field installed on certain indoor units
- See TXV Usage table
- · Chatleff-style fitting

#### Refrigerant Line Kits

- Refrigerant lines are shipped refrigeration clean
- Lines are cleaned, dried, pressurized and sealed at factory
- · Suction line fully insulated
- · Lines are stubbed at both ends

**NOTE** - Not available for 060 models. Must be field fabricated.

#### **FEATURES**

## **COMPRESSOR**

- 3 Scroll Compressor
  - High efficiency with uniform suction flow
  - Constant discharge flow, high volumetric efficiency and quiet operation
  - Low gas pulses during compression reduces operational sound levels
  - Compressor motor is internally protected from excessive current and temperature
  - Muffler in discharge line reduces operating sound levels
  - Compressor is installed in the unit on resilient rubber mounts for vibration free operation

## Scroll Compressor Operation

- Two involute spiral scrolls matched together generate a series of crescent-shaped gas pockets between them
- During compression, one scroll remains stationary while the other scroll orbits around it
- Gas is drawn into the outer pocket, the pocket is sealed as the scroll rotates
- As the spiral movement continues, gas pockets are pushed to the center of the scrolls. Volume between the pockets is simultaneously reduced
- When the pocket reaches the center, gas is now at high pressure and is forced out of a port located in the center of the fixed scrolls
- During compression, several pockets are compressed simultaneously resulting in a smooth continuous compression cycle
- Continuous flank contact, maintained by centrifugal force, minimizes gas leakage and maximizes efficiency
- Compressor is tolerant to the effects of slugging and contaminants. If this occurs, scrolls separate, allowing liquid or contaminants to be worked toward the center and discharged

#### Compressor Crankcase Heater

 Protects against refrigerant migration that can occur during low ambient operation

# **Optional Accessories**

#### **Compressor Sound Cover**

- A reinforced vinyl compressor cover containing a 1-1/2 inch thick batt of fiberglass insulation.
- All open edges are sealed with a one-inch wide hook and loop fastening tape.

#### **CABINET**

- Heavy gauge steel cabinet
- · Five station metal wash process
- Powder paint finish for superior rust and corrosion protection
- Control box is conveniently located with all controls factory wired
- Corner patch plate allows compressor access
- Drainage holes provided in base section

#### **Unit Base**

Durable zinc-coated base section resists rust and corrosion

# 6 Refrigerant Line Connections, Electrical Inlets, Service Valves

- Sweat connection suction and liquid lines
- Located on corner of unit cabinet
- Suction valve can be fully shut off, while liquid valve may be front seated to manage refrigerant charge while servicing system
- Refrigerant line connections and field wiring inlets are located in one central area of cabinet for easy access
- · See dimension drawing

# **Optional Accessories**

#### Hail Guards

- Heavy-gauge steel construction
- · Painted to match cabinet
- · Surrounds unit on all four sides
- Prevent damage to the coil

#### Unit Stand-Off Kit

- · Black high density polyethylene feet
- · Raises unit off mounting surface
- Four feet furnished per order number

#### **FEATURES**

## **CONTROLS**

# **Optional Accessories**

# Compressor Low Ambient Cut-Off Switch

- Non-adjustable switch (low ambient cut-out)
- Prevents compressor operation when outdoor temperature is below 35°F

#### Compressor Time-Off Control

- · Kit prevents compressor short-cycling
- Allows time for suction and discharge pressure to equalize
- Permits compressor start-up in an unloaded condition
- · Automatic reset
- Five minute delay between compressor shut-off and start-up

# Indoor Blower Off Delay Relay Kit

• Delays indoor blower-off time during the cooling cycle

#### Low Ambient Kit

- Heat pump can operate in the cooling mode down to 45°F outdoor air temperature without additional controls
- Two low ambient control options are available for field installation:
- 1. Low Ambient Control Kit (30°F)
- 2. Low Ambient Control (0°F)
  Requires Speed Control and Weatherproof Kit
  (ordered separately). Available for 208/230V
  models only.
- **NOTE** Freezestat should be installed on compressors equipped with a low ambient kit.

#### Freezestat

- Installs on or near the vapor line of the indoor coil or on the suction line
- Senses suction line temperature and cycles the compressor off when suction line temperature falls below it's setpoint
- Opens at 29°F and closes at 58°F

#### Thermostat

• For thermostat options, see Optional Conventional Temperature Control Systems on page 6

#### **INSTALLATION CLEARANCES**

#### NOTES:

Service clearance of 30 in. (762 mm) must be maintained on one of the sides adjacent to the control box.

Clearance to one of the other three sides must be 36 in. (914 mm)

Clearance to one of the remaining two sides may be 12 in. (305 mm) and the final side may be 6 in. (152 mm).

A clearance of 24 in. must be maintained between two units.

48 in. (1219 mm) clearance required on top of unit.

SOUND	SOUND DATA														
¹ Unit									<sup>2</sup> Estimated Sound Pressure Level at Distance From Unit (dBA at distance in ft.)						
Model	125	250	500	1000	2000	4000	8000	Number (dBA)	3	5	10	15	50

NOTE - the octave sound power data does not include tonal correction.

<sup>&</sup>lt;sup>1</sup> Tested according to AHRI Standard 270-2008 test conditions.

<sup>&</sup>lt;sup>2</sup> Estimated sound pressure level at distance based on AHRI Standard 275-2010 method for equipment located on the ground, roof, or on side of building wall with no adjacent reflective surface within 9.8 feet. Sound pressure levels will increase based on changes to assumptions. For other applications, refer to AHRI Standard 275.
