

Mineral Oil? Alkylbenzene? Polyol Ester?

Don't Guess Anymore!

**Highside Chemicals
introduces
the newest chemical
tool for easily
identifying
refrigeration
and air conditioning
lubricants in just
seconds! In two
quick steps, you
can identify:**

OIL CHECKER®

- Oil Checker® saves time and money by eliminating the need for refractometer or expensive laboratory test
- Oil Checker® is easy to use ... get results within seconds
- Oil Checker® avoids the costly mistake of mixing POE and mineral refrigerant oils
- Oil Checker® should be used to check the type of oil in a system before adding additional oil
- Oil Checker® can be used with all types of refrigeration oils

- **Polyol Ester (POE)**
- **Alkylbenzene (ABZ)**
- **Mineral Oil**

Not recommended for Automotive or mobile air conditioning and refrigeration systems.

Oil Checker[®]

Instructions:

1. Remove the White Cap from Vial #1.
2. Partially fill Vial #1 (White Cap) with equal amount of Test Oil. (5cc or approximately 180 drops) to 1/4 inch below Vial Neck.
3. Replace White Cap and Tighten Securely.
4. Shake contents for 2 to 5 seconds. If solution is clear the test oil is Polyol Ester.
GO NO FURTHER. The test is complete.
5. If solution is cloudy in Vial #1 (White Cap), remove the cap (Black Cap) from Vial 2.
6. Partially fill Vial (Black Cap) with equal amount of test oil (5cc or approximately 180 drops) to 1/4 inch below Vial neck.
7. Replace Black Cap and Tighten Securely.
8. Shake contents for 2 to 5 seconds. If the solution is clear the test oil is Alkylbenzene. If the solution is cloudy, the test oil is Mineral Oil.

Vial #1 (White Cap)

Test CLEAR = Polyol Ester

Vial #1 (White Cap)

Test CLOUDY = Mineral Oil or Alkylbenzene

Vial #2 (Black Cap)

Test CLEAR = Alkylbenzene

Vial #2 (Black Cap)

Test CLOUDY = Mineral Oil

Caution: Flammable - Irritant. Nervous System Depressent.
Keep Away from Children. Call 1-800-255-3924, 24 Hours
Warranty Limited to Replacement of Product.
